

SOMALI UNITY SHIELD

TikTok Harassment Evidence Report

This organized report documents repeated online harassment, humiliation-focused reposting, exploitation-based redistribution, and targeted public ridicule involving TikTok accounts reposting and amplifying sensitive livestream content of a vulnerable young Somali female creator.

The purpose of this report is to support urgent platform safety review and escalation by clearly organizing the victim information, observed harm, repeat repost behavior, evidence categories, and attached archive links.

TARGETED VICTIM INFORMATION

TikTok Username	@dheeman.ali
Display Name / Alias	dheeman.ali / istadiamond
Account Description	Young Somali female TikTok livestream creator repeatedly targeted through mass reposting, humiliation-based redistribution, edited clips, mocking captions, and coordinated public ridicule across multiple TikTok repost accounts and livestream communities.

OBSERVED HARM & ESCALATION

The collected evidence demonstrates repeated emotional targeting and public humiliation involving:

- reposting vulnerable livestream moments
- humiliation-focused edits and captions
- redistribution of private or sensitive moments
- mass mocking within comment sections and livestream chats
- coordinated repost behavior across multiple accounts
- emotionally exploitative livestream engagement
- public ridicule involving thousands of viewers simultaneously

The evidence further indicates:

- livestreams reaching several thousand concurrent viewers
- repeated screen recording and redistribution by third-party accounts
- public humiliation involving sensitive personal moments
- targeted harassment campaigns encouraging mockery and viral redistribution
- repeated repost uploads receiving high engagement, shares, comments, and reactions

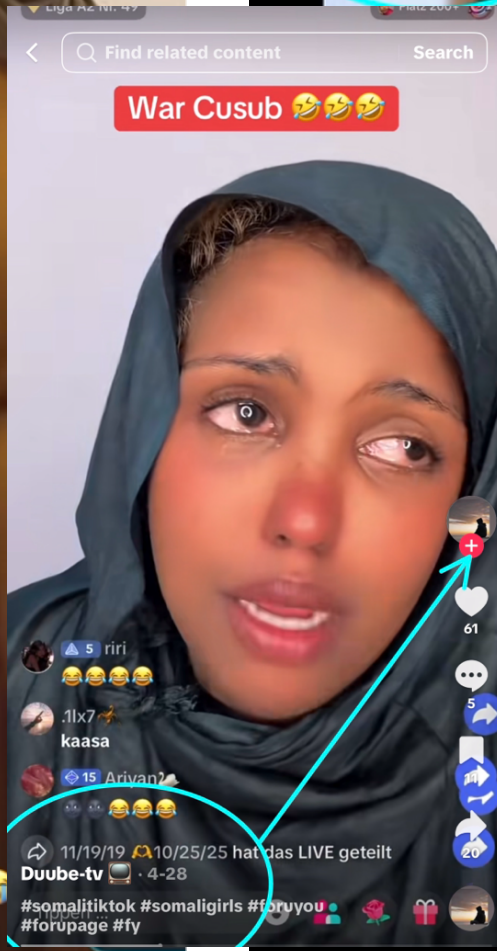

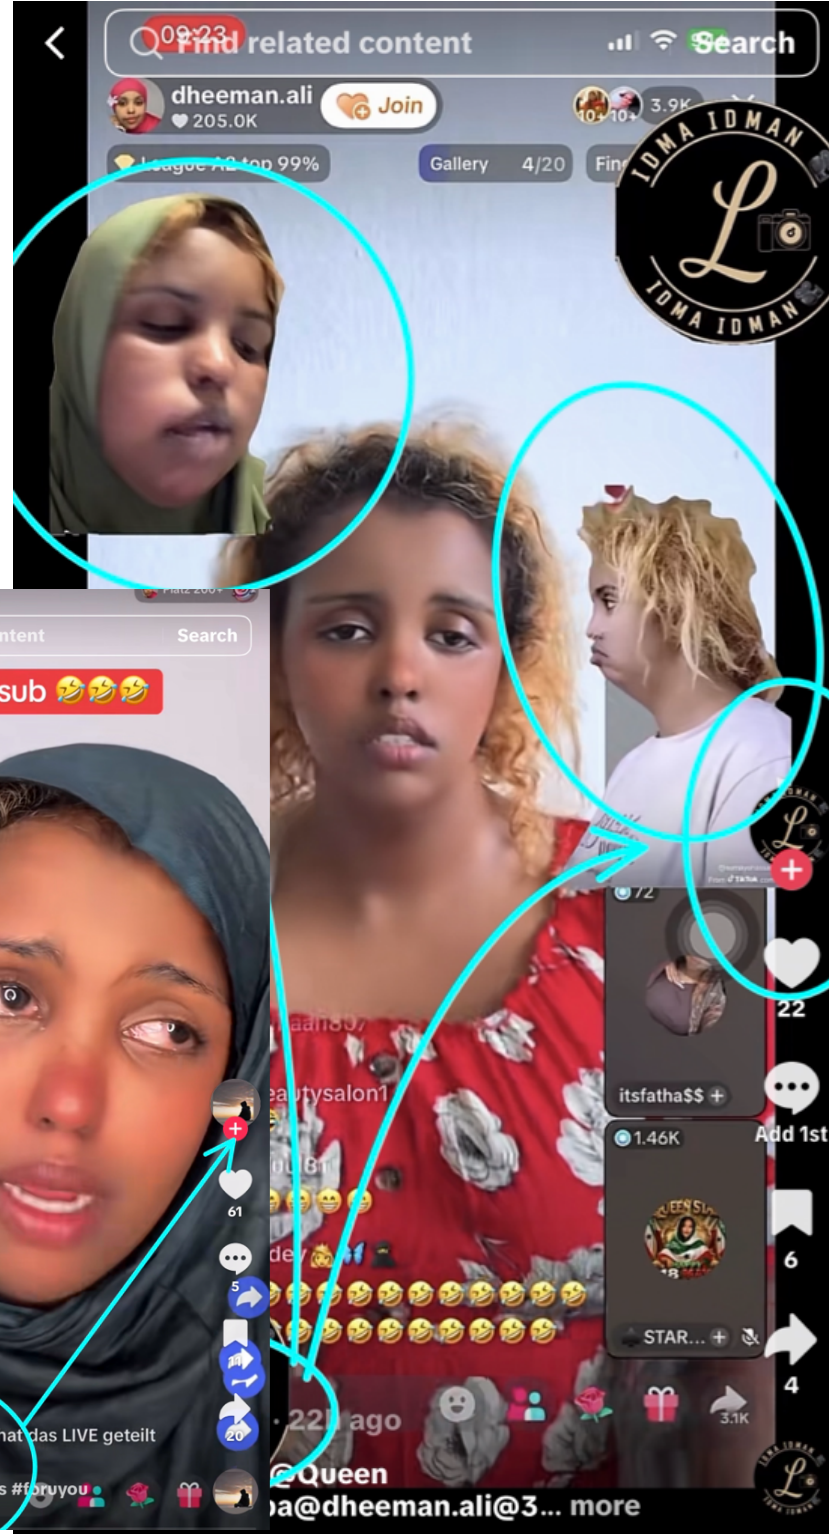

SERIOUS SAFETY CONCERN

Somali Unity Shield is submitting this matter as serious because the conduct appears repetitive, public, and amplification-based rather than isolated. The evidence descriptions indicate that multiple accounts and livestream viewers allegedly used screen recordings, comments, repost captions, and reaction content to mock, pressure, and emotionally distress the targeted individual.

The reported conduct includes pressure and ridicule around sensitive personal claims, including allegations that viewers mocked the individual, challenged her pregnancy claims, and pushed

humiliating livestream behavior in front of a very large public audience. This level of public pressure and repost amplification may create severe emotional harm and requires urgent platform safety review.

Istahil oo live ku kadisey
Oo uurka ku bartay 😭😂💔

“Sensitive screenshots included for documentation and platform safety awareness purposes only.”

IDENTIFIED REPOST OR ASSOCIATED ACCOUNTS

Examples of identified repost or associated accounts include:

- @dheeman.ali
- @amiish_tv
- @duube-tv
- @samii
- additional repost and reaction accounts documented within attached evidence archives and screenshots

EVIDENCE INCLUDED

- screenshot archives
- repost account documentation
- spreadsheet tracking records
- TikTok account links
- harassment evidence report
- livestream repost examples
- engagement screenshots showing mass public interaction

WHY THIS APPEARS TO VIOLATE PLATFORM SAFETY STANDARDS

The behavior documented in the evidence archive appears consistent with harassment, bullying, humiliation-based targeting, abusive reposting, coordinated public ridicule, and repeated redistribution of sensitive personal content. Somali Unity Shield respectfully requests that TikTok review the full archive, not only single videos in isolation, because the harm appears to come from the repeated pattern across accounts, reposts, comments, and livestream engagement.

FORMAL PLATFORM ESCALATION REQUEST

Somali Unity Shield respectfully requests immediate review and escalation of the attached evidence archive due to the repeated redistribution of humiliation-focused content targeting a vulnerable individual across TikTok.

The documented activity demonstrates patterns consistent with:

- targeted harassment
- coordinated humiliation
- abusive repost behavior
- emotionally exploitative engagement
- repeated redistribution of sensitive personal content

Due to the scale, repetition, and public amplification involved, this matter is being submitted as a serious platform safety escalation request requiring urgent moderation review.

The attached archive contains organized evidence files, screenshots, repost tracking records, and account references documenting the ongoing activity.

SOMALI UNITY SHIELD POSITION

Somali Unity Shield stands for digital safety, community protection, responsible reporting, anti-harassment documentation, and platform accountability. This report is submitted to request protection for a vulnerable creator and to stop the repeated viral redistribution of humiliating content.

SOMALI UNITY SHIELD

TikTok Harassment Evidence Report - Complete Evidence Archive

COMPLETE EVIDENCE ARCHIVE LINKS

The following evidence references are provided for urgent platform safety review. The evidence should be reviewed together as one complete archive: the formal report, the spreadsheet tracking records, and the screenshots evidence folder. The pattern of reposting, public humiliation, mass engagement, and repeated redistribution should not be treated as isolated single-video incidents.

1

FORMAL TIKTOK HARASSMENT EVIDENCE REPORT

Main organized report for escalation review, including victim information, observed harm, account references, platform safety concerns, and formal review request.

URGENT PLATFORM SAFETY ESCALATION REQUEST

Somali Unity Shield respectfully requests that TikTok Safety review the full evidence archive together. The concern is not only one video or one account; the concern is the repeated pattern of humiliation-focused reposting, public ridicule, high-viewer amplification, and redistribution of sensitive livestream moments across multiple accounts.
